TRUST SCORE	RISK LEVEL	INPUT TYPE
10 / 100	HIGH RISK	MESSAGE

Report ID: TL-4AD44286E3 | Generated: 01 Oct 2026, 06:49 UTC | Analysis type: Message | Demo: Gemini output pre-recorded

EXECUTIVE SUMMARY

TrustLens assigned a trust score of 10 out of 100, which falls in the HIGH risk band. 9 signals were detected, 5 of high severity: Link does not match SBI, Asks for OTP or credentials, Possible impersonation, KYC expiry threat, Threat of consequences, Suspicious link pattern, and others.

DETECTED SIGNALS (9)

HIGH	Link does not match SBI -25 pts SOURCE: RULE The message claims to be from State Bank of India, but the link goes to bit.ly, which is not one of its official domains. Evidence: "SBI" vs bit.ly
HIGH	Asks for OTP or credentials -20 pts SOURCE: RULE SOURCE: GEMINI The message asks you to enter an One-Time Password (OTP) on a third-party link. Banks continuously instruct customers never to share OTPs or input them on unverified web pages. Evidence: OTP
HIGH	Possible impersonation -20 pts SOURCE: RULE Message claims to be from State Bank of India and makes a high-risk request through a channel that cannot be verified. Evidence: SBI
HIGH	KYC expiry threat -15 pts SOURCE: RULE SOURCE: GEMINI The sender claims your KYC has expired and threatens to block your account within 24 hours if action is not taken. Legitimate banks rarely suspend services with such short notice via simple text messages. Evidence: KYC has expired

HIGH

Threat of consequences -15 pts

SOURCE: RULE

Threatening to block an account or take legal action creates fear so the reader acts without checking. (2 matching phrases found.)

Evidence: account will be blocked

MEDIUM

Suspicious link pattern -9 pts

SOURCE: RULE

The link has login/verification wording in the link on a domain that is not a known organisation.

Evidence: bit.ly/sbi-kyc-2026

MEDIUM

Urgency -6 pts

SOURCE: RULE

A tight deadline pressures the reader to act before checking. (4 matching phrases found.)

Evidence: expired today

MEDIUM

Coercive Urgency for Action -6 pts

SOURCE: GEMINI

The message uses high-pressure language demanding immediate compliance to induce panic. This is a common tactic used to bypass critical thinking.

Evidence: Update KYC immediately

MEDIUM

Shortened link -5 pts

SOURCE: RULE

A shortener hides the real destination of the link.

Evidence: bit.ly/sbi-kyc-2026

Score: $100 - 60 - 30 = 10$. Deductions by category: message content: 60 of 82 (capped); url domain: 30 of 39 (capped). The score is computed in code from the signals above, not chosen by a model.

EVIDENCE SUMMARY

- Link does not match SBI (RULE): "SBI" vs bit.ly
- Asks for OTP or credentials (RULE + GEMINI): OTP
- Possible impersonation (RULE): SBI
- KYC expiry threat (RULE + GEMINI): KYC has expired
- Threat of consequences (RULE): account will be blocked
- Suspicious link pattern (RULE): bit.ly/sbi-kyc-2026
- Urgency (RULE): expired today
- Coercive Urgency for Action (GEMINI): Update KYC immediately
- Shortened link (RULE): bit.ly/sbi-kyc-2026
- Inconsistency noted: The message claims to be from official bank SBI, but uses a shortened link service (bit.ly) instead of an official sbi.co.in domain.

RECOMMENDED ACTION

Do not pay, click or share any code yet. Verify with the organisation through its official app, website or a number from your own records. Do not click on the link or share any OTP or personal details. Contact SBI directly using official channels to check your account status.

VERIFICATION STEPS

1. Check your official SBI YONO app or log into internet banking directly via sbi.co.in to see if there are any real KYC notifications.
2. Call the official SBI customer care helpline number listed on the back of your debit card or official website.
3. Verify the sender address or SMS header against known official SBI notification handles.

ANALYSED CONTENT (EXCERPT)

SBI Alert: Dear customer, your SBI YONO account KYC has expired today. Your account will be blocked within 24 hours. Update KYC immediately by clicking bit.ly/sbi-kyc-2026 and enter the OTP to verify. -SBI

LIMITATIONS

- Sender identity cannot be verified from text alone

DISCLAIMER TrustLens provides risk indicators based on available evidence. A risk score is not proof of authenticity or fraud. Report wording: generated directly from the TrustLens analysis. Signals marked RULE come from deterministic checks; signals marked GEMINI come from Gemini reasoning.
